

■ IDNV-Catalogue – The research system

The IDNV-Catalogue is the system for searching, with which it is possible to search quickly and flexibly in many publishers' catalogues of different countries.

With the IDNV catalogue software you can also use the IDNV as internal searching system. Depending on the type of participation, in-house user licences are available.

You obtain a comfortable searching system for yourself and your colleagues/employees. The catalogue provides you with an overview of both your own catalogue and the complete IDNV catalogue and can give you valuable support for planning, marketing and sales.

From version 3.0 upwards, information on digital items which are offered via AODP by publishers and distributors are displayed additionally in the catalogue.

Selected Features of IDNV-Catalogue

- Quick, flexible searching possibilities in all the databases and fields
- Individual display of items (item window)
- Searching possibilities according to many criteria simultaneously
