IDNV-Master – for your data management

With the powerful software system IDNV-Master, you can manage your catalogues in a flexible database and publish them into the system with the quick and secure data exchange facility on a daily basis.

You can enter your information, changes and new items once and send them with one click of the mouse to all your customers without delay.

At the same time, you can always gain an insight into the IDNV's general catalogue.

In IDNV-Master you can manage small catalogues as well as large ones. The program is made available with participation (depending on the group) or it can be hired at a reasonable cost.

Furthermore, from version 3.0 upwards you have the possibility to register your digital items and, in a second step, send them to your your virtual warehouse, the AODP distribution server.

Selected Features of IDNV-Master

- Easy creation of item data in entry masks
- Convenient entry of image files
